## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent No. 6,212,636 to Boyle et al.

As per claims 1 and 2, Boyle et al. disclose the limitations of these claims (see at least the abstract).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2132

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyle et al. in view of the examiner taking official notice.

As per claims 3, 4, 6 and 7, Boyle et al. do not suggest the limitations of these claims. The examiner, however, takes official notice that these features are typical of many similar methods with this type of application. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have to have included these features in the method disclosed by Boyle et al. since they comprise the very essence of methods such as that of Boyle.

As per claim 5, Boyle et al. do not disclose this feature. The examiner further takes official that it is well known in the art to use a key derivation function to provide identities.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,246,771 to Stanton et al. entitled Session Key Recovery System and Method.
